

Career Objective

Results-driven infrastructure and application engineer with hands-on experience in frontend development and a strong foundation in system administration and cloud technologies. Adept at analyzing systems, identifying technical issues, and delivering effective solutions. Eager to contribute to cross-functional infrastructure projects, support strategic IT operations, and grow as a cloud and systems specialist.

Projects

Flight Booking Website

- Technologies: React.js, JavaScript, CSS, HTML
- Designed and deployed a responsive, cloud-ready web app simulating real-world airline infrastructure.
- Applied client-server principles to optimize search and load times.
- Enhanced system responsiveness and ensured uptime through component-level code optimization.

Car Rental Website

- Technologies: HTML, JavaScript, CSS
- Integrated filtered search and dynamic pricing to mimic enterprise-grade logic.
- Emulated real-time interactions and booking systems, useful for understanding backend integration and service dependencies.
- Integrated filtered search and dynamic pricing to mimic enterprise-grade logic.

E-commerce Website

- Technologies Used:- HTML, CSS, JAVASCRIPT
- Designed and developed a mock e-commerce product page as part of a class project. The page includes product images, descriptions, and an add-to-cart feature.
- Implemented key e-commerce features such as product display, descriptions, and an "add-to-cart" functionality.
- Enhanced project with interactive elements such as animations, hover effects, and smooth transitions.

Skills

- **Cloud Platforms:** AWS (basic services), Azure (exposure)
- **Operating Systems:** Windows, Linux (basic admin tasks)
- **Web Development:** React.js, JavaScript, HTML5, CSS3, Bootstrap
- **Infrastructure Tools:** Git, CLI tools, scripting basics
- **Problem Solving:** Root cause analysis, troubleshooting
- **Soft Skills:** Agile team collaboration, documentation, solution-first mindset

Education

2019-2023

B-Tech Graduate in Mechanical engineering, from "Gayatri vidhya parishad collage of Engineering", Vishakhapatnam

Certifications

- Completed comprehensive training in frontend development, covering key technologies like HTML, CSS, JavaScript, React.js, and responsive design.
- Self-studied foundational concepts in AWS Cloud Essentials and Linux command-line operations
- Volunteered for a marathon Vizag-24 as a technical support engineer.
